Competition Policy for Economic and Human Development

Universidade Presbiteriana
Mackenzie

1952 – 2022

"Competition Policy for Economic and Human Development" is a Doctorate and Master class at Mackenzie Presbyterian University – Sao Paulo/Brazil, starting on August 12, 2022, which is also available for interested parties who do not belong to the Mackenzie student body and is offered in a hybrid format through Microsoft Teams platform.

Competition policy is a powerful tool for bolstering efforts to reduce poverty and generate shared prosperity. Competitive markets work as drivers of economic growth and productivity and as conduits for consumer welfare with lower prices, better products and services, and innovation.

During 12 online classes, starting on August 12, until November 11 (Friday's morning Brazilian Time), Professor Vicente Bagnoli will offer lectures delivered by invited renowned academics and authorities from around the world to present, explore and debate current issues of Competition Law and Policy, such as: data, competition policy and digital economy; green economy and sustainability; competition advocacy; European regulation of digital gatekeepers; hub-and-spoke agreements; fighting corruption and promoting competition; and competition and the IP perspective.
